Release N° 19

### Fednav orders new ice-breaking bulk carrier

Fednav has recently placed an order with Sumitomo Corporation and Universal Shipbuilding Corporation, Japan, for the design and construction of an ice-breaking bulk carrier that will deliver in December 2013. The new vessel to be built at Universal's Tsu shipyard will be classed by Det Norske Veritas and have a design deadweight of 25,000 tonnes. The ship will be committed to a long-term contract with Canadian Royalties Inc. for the transport of nickel and copper concentrates from its Nunavik mine in northern Quebec and of mine supplies and equipment on the return trip.

### Fednav named Bulk Ship Operator of the Year at IBJ Awards

Fednav Group was presented with the International Bulk Journal's award for Bulk Ship Operator of the Year on November 19 at a gala at the Elysée Hotel in Hamburg. The award, received for the second time since 2009, highlights the company's contribution to maritime trade, and its leadership in the implementation of higher industry operating standards, including environmental protection and safety.

### Federal Sable visits the Lantic Sugar Terminal in Montreal

Jo Makin, vessel's godmother, and Mark Pathy

On October 11, Fednav Limited marked the first visit of its ship, the *Federal Sable*, to the Lantic Sugar Terminal at the Port of Montreal. The event highlighted the exceptional 40-year partnership between these two Montreal institutions. The *Federal Sable* is the first in a series of eight ice-class vessels of 37,200 DWT delivered by the Ouhua shipyard in China in 2012, and part of the 2012 to 2016 fleet renewal program of 21 newbuildings ordered from Japanese and Chinese yards in the last two years.

### HPA's recognition of FMT's environmental performance

Federal Marine Terminals (FMT) Hamilton was the first recipient of the Hamilton Port Authority Annual Environmental Recognition Award. It was presented at the HPA's 100<sup>th</sup> Anniversary Port Partner Appreciation Event on October 3.

### Delivery of Federal Mayumi

Fednav has added another new vessel to its growing fleet of ships, the *Federal Mayumi*, built at Oshima Shipyard in Japan. This vessel is a sister ship to *Federal Satsuki*, another Oshima-class vessel ordered through long-standing Japanese partner, Sumitomo Corporation. Jessica Pathy blessed the new 36,000 DWT ice-class vessel in a naming ceremony held on October 2.
